

YOU GOT IT

Anywhere you want
printing your documents,
easy, affordable
and secure

CLOUD PRINT

Printing anywhere, easy,
affordable and secure.

The new V5 platform improves continuously introducing new concepts and features for a unique 360 degree solution. Cloud printing simplifies the management of the users printing.

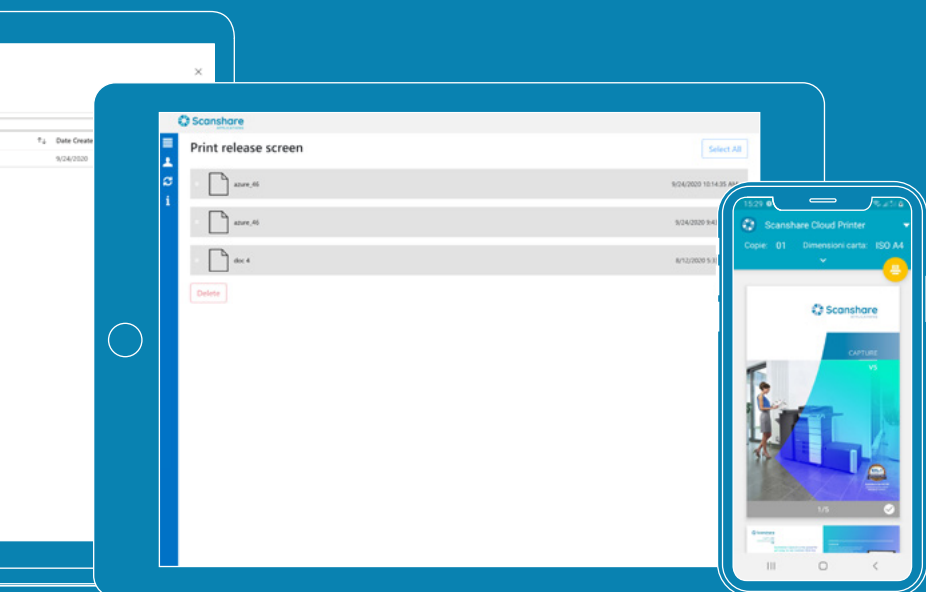

Simply printing management with Scanshare Cloud Print, move to a full cloud solution empowering Microsoft Azure Universal Print. Integrate seamless users with Microsoft Azure AD without the needs of configuring complex local configuration. All your local printers available everywhere, always.

Scanshare Cloud Print allows to handle printing with no efforts, anytime. Configuration is straight forward with an automatic process to connect Scanshare Cloud Print to the Microsoft Azure Universal Print tenant, no installations, no drivers, and pre-configurations.

Allow all users from your organization to print directly to the Azure Scanshare Cloud Printer, anywhere they are. Once at the printer list your pending print jobs and release them with a single click, directly from the cloud. Scanshare Cloud Print is fully enabled to BYOD with the Scanshare Cloud Print Chrome extension for Chromebooks and mobile printing via the Scanshare Mobile Android and iOS native apps.

Printing data is stored securely on Azure based on the Microsoft Security guidelines for privacy protection, all your print date is safe.

Increased productivity and next level print management with Scanshare Cloud Print.
